How to play an LP (aka vinyl):

1. Press the power button to turn on the tuner.

2. Connect headphones to the headphone jack. Headphones and an adaptor are available for checkout at the Learning Commons Desk.

3. Make sure the tuner selector switch is set to Phono (turntable) and the volume is turned down.

4. Carefully slip the record out of its protective sleeve, and, holding it by the outside rim, place it down on the turntable.

5. Move the tonearm from the resting position to the position above the track you wish to play. Each groove represents a track on the record. Moving the arm will set the turntable in motion. The tonearm, stylus, and the record are delicate and should be handled with care.

6. Use the queuing control at the front of the turntable to lower the needle onto the record and to lift the needle off the record when you are done.

7. Adjust the volume on the turner and enjoy.

8. When you’re finished listening, use the queuing control to lift the needle, move the tonearm back to the resting position, and slip the LP back into the sleeve and record cover. Turn down the volume and turn off the tuner.

9. Lock the carrel (see instructions) and return the key, headphones, and LPs to the Learning Commons Desk.

If you need assistance with the carrel or with the equipment, please ask for help at the Learning Commons Desk.
